Meet Pokal

Mumbai, Maharashtra, India meetpokalwork@gmail.com 7304263532 linkedin.com/in/meetpokal github.com/meetpokal1

SUMMARY

MCA aspirant with a strong foundation in **Python**, **SQL**, **Data Analytics**, and **Backend Development**, with hands-on experience building **Python-based applications**, **REST APIs**, **automation tools**, and **AI-powered solutions**. Skilled in **Data Analysis**, **data cleaning**, **Advanced Excel**, **Power BI**, **PostgreSQL**, and Python libraries such as **Pandas** and **NumPy**, along with backend technologies including **FastAPI**, **REST APIs, JSON, and SQLAlchemy**. Strong analytical thinking, **problem-solving**, **communication,** and **teamwork skills**, with a passion for using technology to solve real-world business problems and build practical software solutions. Seeking an entry-level opportunity in **Data Analytics**, **Python**, or technology-driven roles where I can contribute technically, learn from experienced professionals, and grow toward **data engineering** and **cloud technologies**.

PROJECT

Pharmaguard AI

AIVOA Internship Assignment • github.com/meetpokal1/PharmaGuard-AI • July 2026 - July 2026

- Built an **AI-powered complaint management application** that automates pharmaceutical complaint processing using modern AI engineering workflows. Leveraged **LangGraph, Groq LLM, and Prompt Engineering** to extract complaint details, classify severity, generate professional responses, and maintain conversational context for complaint updates and corrections. Features include PDF/text complaint analysis, intelligent severity detection, structured data extraction, AI-powered chat assistance, and a responsive web interface.
- **Tech Stack**: Python, FastAPI, React.js, JavaScript, LangGraph, Groq API (LLM), HTML, CSS, JSON, Git, GitHub.

Dubpilot — Automated Video Dubbing System

github.com/meetpokal1/Dubpilot • August 2026 - September 2026

- Built an **end-to-end Python AI pipeline** that converts YouTube videos in different languages into English-dubbed videos while maintaining audio-video synchronization.
- Integrated **Whisper** for timestamped speech-to-text, **IndicTrans2/Google Translate** for translation, and **Edge-TTS** for English speech synthesis.
- Used **FFmpeg and timestamp-based audio processing** to time-adjust generated speech, assemble the dubbed audio track, and replace the original audio without re-encoding the video stream.
- **Tech Stack:** Python | Whisper | IndicTrans2 | Edge-TTS | FFmpeg | yt-dlp | pydub | Google Translate

GST Invoice & Ledger Automation Tool

github.com/meetpokal1/GST-Invoive-Automation • May 2026 - June 2026

- Built a Python tool that automates GST (CGST/SGST/IGST) validation across batches of invoices, applying intra-state vs. inter-state tax rules and auto-flagging calculation mismatches
- Developed a Streamlit web app enabling non-technical users to upload invoices, view flagged discrepancies, and export a formatted multi-sheet Excel ledger
- Reduced manual invoice reconciliation effort by automating a process typically done by hand in accounting workflows

EDUCATION

Master of Computer Application (MCA) - Pursuing 2026

D.Y. Patil University • Navi Mumbai

MCA CET Aptitude

CET CELL Maharashtra • 2026 • 90 Percentile

Bachelor of Commerce

Mumbai University • 2025

SKILLS

Programming: Python, SQL
Data & Analytics: Advanced Excel, Power BI, Pandas, NumPy, Data Cleaning, Data Analysis, Data Visualization
Backend & APIs: FastAPI, REST APIs, HTTP/HTTPS, JSON, SQLAlchemy, API Integration
Databases: PostgreSQL, MySQL
AI Application Development: LLM APIs, RAG Fundamentals, LangGraph, Prompt Engineering
Cloud & Engineering: Cloud Computing Fundamentals, Linux Fundamentals, Git, GitHub, Postman, Swagger/OpenAPI

Professional Skills: Problem Solving, Analytical Thinking, **Communication**, Team Collaboration, Adaptability, Attention to Detail
