Meet Pokal

Mumbai meetpokalwork@gmail.com 7304263532 linkedin.com/in/meetpokal meetpokal1.github.io

SUMMARY

Entry-level **Data Analyst / BI / Reporting** candidate with hands-on experience in **Excel-based financial reconciliation, audit support, and inventory verification**. Python/SQL projects demonstrate **data cleaning, validation, retail profitability and inventory analysis, and commodity-price research** to support reliable reporting and evidence-based decisions.

EXPERIENCE

Freelance Audit & Excel Reconciliation Support

Self-Employed / Independent Contract Work **May 2026 - Present**

- Reviewed **bank statements and Statements of Account (SOAs)**, checking bounce entries and verifying **interest calculations** across monthly and quarterly billing cycles.
- **Reconciled debit/credit calculations** for penal charges against **Days Past Due (DPD)** periods and supporting records, investigating discrepancies for follow-up.
- Reviewed loan documentation, including **valuation and legal reports**, against applicable criteria and organized financial records in **Excel** to document findings.

Retail Stock Audit Support

Project-Based, Independent Work **August 2024 - June 2025**

- Performed **physical inventory verification** across assigned retail locations, comparing recorded stock data with observed counts to identify **discrepancies**.
- Used **Excel** to organize stock information and document audit findings for review.

PROJECT

MarketPulse India — Essential Commodity Price Intelligence

github.com/meetpokal1/MarketPulseIndia • October 2026 - October 2026

- Built a **data-validation pipeline for 1.48M wholesale price observations across six states**, quarantining 74 rule-flagged records while retaining approximately 99.95% of observations for analysis.
- Investigated **market price spreads and arrival–price relationships**, including a 507-trading-day Lasalgaon–Mumbai onion comparison and fixed-effects statistical modeling with cluster-robust standard errors.
- **Tech Stack:** Python, DuckDB, Polars, Statsmodels, Streamlit, Tableau Public

InsightFlow — Retail Profitability, Inventory & Data Integrity Intelligence

github.com/meetpokal1/Insightflow • September 2026 - October 2026

- Built a **Python data-cleaning and validation pipeline** to process deliberately messy synthetic retail data, track corrections and rejected records, and load validated data into PostgreSQL.
- Developed **SQL analyses and Power BI/Streamlit reporting views** to investigate product profitability, pricing scenarios, inventory and replenishment priorities, and data-quality exceptions for business decision support.
- **Tech Stack:** Python, Pandas, SQL, PostgreSQL, Power BI, DAX, Power Query, Streamlit, FastAPI, pytest

EDUCATION

Master of Computer Applications - MCA

D.Y. Patil University - Online • Navi Mumbai • 2028

- MCA CET Aptitude 2026 : 90th Percentile
- Mathematics & Statistics, Logical/Abstract Reasoning, English Verbal Ability, and Computer Concepts.

Bachelor of Commerce

Mumbai University • Mumbai, Maharashtra, India • 2025

CERTIFICATIONS

Data Analytics Job Simulation

Deloitte Australia • 2026

SKILLS

Programming & Data Analysis: Python, SQL, Pandas, NumPy, Polars

BI & Reporting: Advanced Excel, Power BI, DAX, Power Query, Tableau, Streamlit, data visualization

Databases & Workflow: PostgreSQL, DuckDB, SQLite, MySQL, Git, GitHub

Analytical Methods: Data cleaning and validation, data reconciliation, exploratory data analysis, descriptive statistics, profitability and margin analysis, inventory analysis, price-trend analysis
