SUMMARY

MCA student with practical, project-based experience in data analysis, business process automation, and Python development. Skilled in Python, SQL, Advanced Excel, Power BI, Pandas, and NumPy, with hands-on work in data cleaning, financial record validation, and building reporting tools that replace manual Excel-based processes. Brings a Commerce background (B.Com, 2025) and strong analytical thinking to invoice reconciliation, data validation, and business reporting. Seeking a Data Analyst / Business Intelligence internship to apply these skills in a real business environment.

TECHNICAL SKILLS

Data Analysis & BI: Advanced Excel, Power BI, SQL, Data Cleaning, Data Analysis, Data Visualization

Programming: Python, Pandas, NumPy

Databases: PostgreSQL, MySQL

Tools & Additional Exposure: Streamlit, Git, GitHub, FastAPI, REST APIs, JSON, Prompt Engineering, LangGraph

Professional Skills: Analytical Thinking, Problem Solving, Attention to Detail, Communication, Team Collaboration

PROJECTS

GST Invoice & Ledger Automation Tool

github.com/meetpokal1/GST-Invoive-Automation · *May 2026 – June 2026*

- Built a Python tool to validate CGST, SGST, and IGST calculations across batches of invoices, applying intra-state and inter-state tax rules to automatically detect and flag calculation mismatches.
- Designed a Streamlit-based interface so non-technical users can upload invoices, review flagged discrepancies, and export a formatted, multi-sheet Excel ledger.
- Automated a reconciliation workflow that is typically performed manually in accounting processes, reducing repetitive manual cross-checking of invoice data.

Tech Stack: Python, Streamlit, Excel (multi-sheet export)

PharmaGuard AI — Pharmaceutical Complaint Management App

AIVOA Internship Assignment · *github.com/meetpokal1/PharmaGuard-AI* · *July 2026*

- Built an AI-powered complaint management application that automates pharmaceutical complaint processing, as part of an AIVOA internship assignment.
- Used LangGraph, the Groq LLM API, and prompt engineering to extract complaint details, classify severity, and generate structured responses.
- Implemented PDF and text-based complaint analysis, conversational context handling for complaint updates and corrections, and a responsive web interface (FastAPI backend, React.js frontend).

Tech Stack: Python, FastAPI, React.js, JavaScript, LangGraph, Groq API, JSON, Git, GitHub

Dubpilot — Automated Video Dubbing System

github.com/meetpokal1/Dubpilot · *August 2026 – September 2026*

- Built an end-to-end Python pipeline that converts YouTube videos in other languages into English-dubbed videos while preserving audio-video synchronization.
- Integrated Whisper for timestamped speech-to-text, IndicTrans2 / Google Translate for translation, and Edge-TTS for English speech synthesis.
- Used FFmpeg and timestamp-based audio processing to adjust speech timing, assemble the dubbed audio track, and replace the original audio without re-encoding the video.

Tech Stack: Python, Whisper, IndicTrans2, Edge-TTS, FFmpeg, yt-dlp, pydub, Google Translate

EDUCATION

Master of Computer Applications (MCA) — Pursuing

D.Y. Patil University, Navi Mumbai

MCA CET Aptitude — 90th Percentile

CET Cell Maharashtra, 2026

Bachelor of Commerce

Mumbai University — 2025

CERTIFICATIONS

Deloitte Data Analytics Job Simulation — Forage | View Certificate
